PROFESSIONAL SUMMARY

A results-oriented professional with 1+ years of enterprise experience in building scalable data pipelines and implementing complex ETL processes. Certified **AWS Machine Learning - Associate** and skilled in Python and machine learning. Seeking Data Engineer, ML Engineer, or Data Scientist roles to leverage expertise in Python, cloud ML operationalization, CI/CD, and statistical modeling.

WORK EXPERIENCE

Deloitte USI | Hyderabad, India
Workday Integration Developer (Data & Integration Solutions) July 2024 – Present

- Designed and developed scalable ETL pipelines using Workday Studio and Core Connectors to extract, transform, and load millions of records of HR and Financial data from diverse source systems (SQL databases, flat files, APIs) into the Workday cloud platform.
- Performed exploratory data analysis (EDA) and data profiling on source system data to identify inconsistencies, missing values, and mapping requirements, ensuring data integrity and quality prior to migration.
- Authored complex XSLT transformations to cleanse, standardize, and enrich raw XML data, implementing logic for calculated fields, value mapping, and data type conversions to meet business rules.
- Developed and executed systematic data validation frameworks using custom reports and scripts, reducing data-related post-production issues by an estimated 40%.
- Built and deployed REST API integrations to automate data exchange between internal and external systems, improving data flow efficiency and eliminating manual processes.
- Utilized a diagnostic approach to troubleshoot and resolve data discrepancies by analysing complex XML/JSON payloads, identifying root causes of system and data failures.

PROJECTS

House Price Prediction WebApp GitHub Link

- Developed a machine learning web app to predict house prices using Python, Flask, and scikit-learn with 72% accuracy.
- Built and trained a linear regression model, and serialized it for deployment.
- Designed a responsive web interface for user input and result display using HTML and CSS.
- Containerized the application with Docker to ensure consistent deployment across environments.
- Implemented automated testing and CI/CD workflows using GitHub Actions.

SKILLS

Programming: Python (Pandas, Matplotlib, Seaborn, Flask, Scikit-learn), C++, SQL
Technical Skills: Power BI, Git, DVC, AWS Sage maker, Machine Learning, Data Analysis, Statistical Modelling, CI/CD Pipeline, GitHub Actions

CERTIFICATIONS

- AWS ML Associate - AWS | March 2025 Verify Credentials
- Deloitte AI Academy - Data Science & Machine Learning

EDUCATION

Veer Surendra Sai University of Technology
Master of Computer Application (MCA) 2022 – 2024 | CGPA: 8.6
